

Asset Manager with the owner's perspective

As a fully integrated real estate company, retail and hospitality property owner and value creator in family ownership, Jagdfeld Real Estate (JRE), based in Düren, develops and manages a broad portfolio covering retail, residential, office and hotel properties. It also welcomes third-party mandates.

For over 45 years, JRE, as part of the Jagdfeld Group, has been successfully developing, realising and managing retail, office, hotel and residential properties with great **enthusiasm**. More than 800 properties with a volume of over five billion euros have been realised and managed since then. Currently, 200 **specialists** manage properties worth approximately 3 billion euros with a total area of approximately 717,000 m².

In collaboration with renowned architects, data analysts and market researchers, **individual location concepts** are created for retail, residential, office and hotel properties – either as standalone or mixed-use projects. JRE implements these projects entirely from a **single source**. The holistic project development solutions for **shopping centres**, retail parks, residential properties and student accommodation, among others, are

precisely tailored to the needs of the relevant target groups in the catchment area. JRE thus creates and manages the **marketplaces of tomorrow**, with local amenities and community services.

To this end, the company has been using **established strategic target group models** based on psychology for many years in the development, repositioning, revitalisation, letting and management of commercial properties. These models originate from **neuroscientific research** and combine this with **empirical consumer research** and geodatabases for localisation.

As a fast-growing family business, JRE offers a **high level of service depth** along the **entire value chain**.

This enables great foresight even in highly complex assets. The senior-led and senior-staffed interdisciplinary teams have many years of **industry experience** in proprietary and third-party mandates. Proactive entrepreneurial action based on **own investments** in the

managed properties characterises JRE's services.

The company professionally accompanies and shapes the **transformation** in the real estate industry and designs and implements the **neighbourhood development** of tomorrow.
